SKILLS

- Front-End Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap, Tailwind CSS
- Back-End Development: Node.js, Express.js, REST API Design & Integration
- Databases: MySQL, MongoDB
- Version Control: Git & GitHub
- Programming Languages: C++, C#

EDUCATION

BS Computer Science | PMAS Arid Agriculture University, Rawalpindi

2024-2028

Strong foundation in software engineering, data structures, algorithms, OOP, and web technologies — applied through real-world front-end and back-end projects.

ICS (Intermediate in Computer Science) | Jinnah School and College, Piplan

Completed | 83%

ACADEMIC PROJECTS

Sneakers Store — E-Commerce Sneakers Website

HTML5 | CSS3 | JavaScript | Bootstrap

- Built a fully responsive, four pages e-commerce website (Home, About, Products, Contact) entirely from scratch — no AI tools used, guided solely by YouTube tutorials and core web fundamentals.
- Implemented a mobile-first responsive layout using Bootstrap grid, ensuring seamless user experience across all screen sizes and devices.
- Demonstrated strong foundational skills in UI design, component structuring, and interactive JavaScript functionality.

Apex Velocity — Luxury Car Dealership Web App

Next.js | React | Tailwind CSS

- Developed a modern, full-stack luxury car dealership web application featuring a dynamic hero carousel, real-time vehicle search & filtering, and detailed individual vehicle pages.
- Leveraged Next.js dynamic routing and SSR for fast, SEO-optimized page loads, with smooth animations and a fully responsive UI/UX.

GymFit — Gym Management System

Node.js | Express.js | JavaScript | REST API

- Built a comprehensive full-stack gym management platform with complete CRUD operations for member and trainer records, admin authentication, and real-time dashboard analytics.
- Integrated membership plan management, advanced search & pagination, dark/light mode toggle, and a fully responsive mobile UI — backed by a REST full APIs with Local Storage persistence.

DEVELOPMENT FOCUS

- Front-end Development — responsive, performant web interfaces using React.js and Next.js
- Full-Stack Web Applications — integrating Node.js/Express back-ends with modern front-end frameworks
- RESTful API Development — designing and consuming APIs with clean architecture and error handling
- UI/UX Implementation — translating design concepts into polished, cross-device compatible experiences

ACHIEVEMENTS / HOBBIES

- Self-taught developer — built multiple projects independently through documentation and hands-on practice.
- Passionate about cars and automotive technology; created Apex Velocity as a assignment project.
- Continuous learner — actively expanding skills in back-end systems, databases, and cloud deployment.
